Who We Are

At PM Dental Labs, we are proud to be a full-service dental laboratory dedicated to providing exceptional quality and affordability. With decades of experience and millions of cases completed, we have built a reputation for reliability, precision, and unwavering commitment to our clients.

What sets us apart is our personalized one-to-one service and complete transparency in our manufacturing processes. We understand the importance of trust in dental care, which is why we prioritize delivering the best possible service for your patient's dental needs.

Why Choose Us?

THE PM Dental Labs WAY

We utilize state-of-the-art tools like digital X-rays, CAD/CAM systems, and premium dental materials for precise, efficient treatments. Rigorous infection control protocols and sterilization practices meet CDC and HIPAA guidelines, ensuring your safety at every visit.

Full Dentures

PM Dental Labs Economy Denture

The Economy Denture is a cost effective denture fabricated by a cold curing process using Ivoclar ProBase® Cold. This denture has a smooth surface and minimal characterization. Classic® teeth are used.

PM Dental Labs Premium Denture

The Premium Denture is fabricated by an injection heat cured method using Ivoclar IvoBase/Ivocap® which aids in consistent polymerization. More characterization is added to the denture by festooning and stippling. Kulzer Mondial teeth are used.

PM Dental Labs Signature Denture

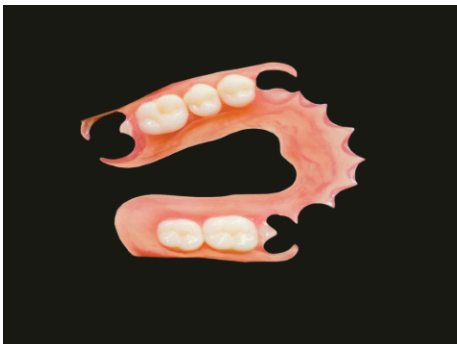

The Signature Denture is fabricated by an injection heat cured method using Ivoclar IvoBase/Ivocap® which aids in consistent polymerization. More characterization is added to this denture by festooning, stippling, and tissue tinting to match the patient's gingiva. Your choice of premium teeth are used.

Partial Dentures

Cast Partial Denture

- Laser Printed Cobalt-Chromium
- Alloy Fatigue Resistant
- Designed for Precision Fit
- Certified 3DRPD Laboratory & Designer

DuraFlex™

- Advanced Thermoplastic Material
- Flexible & Translucent
- Easy to Adjust & Polish
- Tissue Colored Clasps

VisiClear®

- Metal-Free Alternative
- Durable & Biocompatible
- Flexural Strength
- Little Moisture Absorption

Zirlux Acetal®

- Metal-Free Alternative, Hypoallergenic
- Comfortable & Easy to Wear
- High Strength to Weight Ratio
- Tooth Colored Clasps

Implants

Single Tooth Implant

All-On-4 Dental Implant

Implant Bridge

All-On-6 Dental Implant

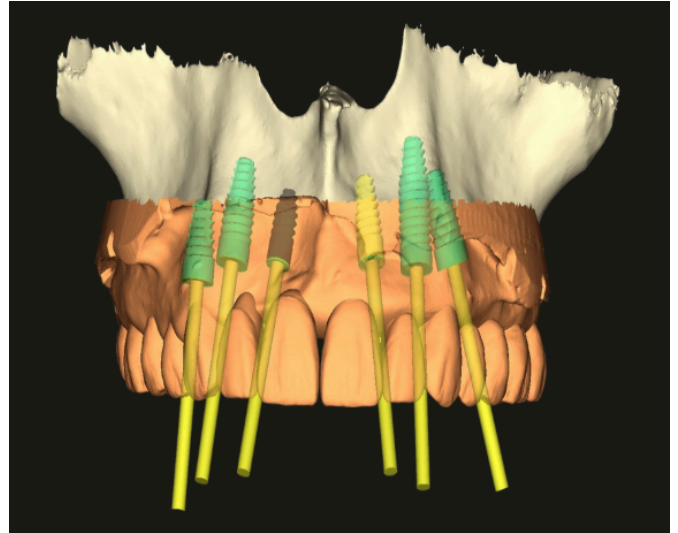

Guided Surgery

Surgical Planning Made Easy!

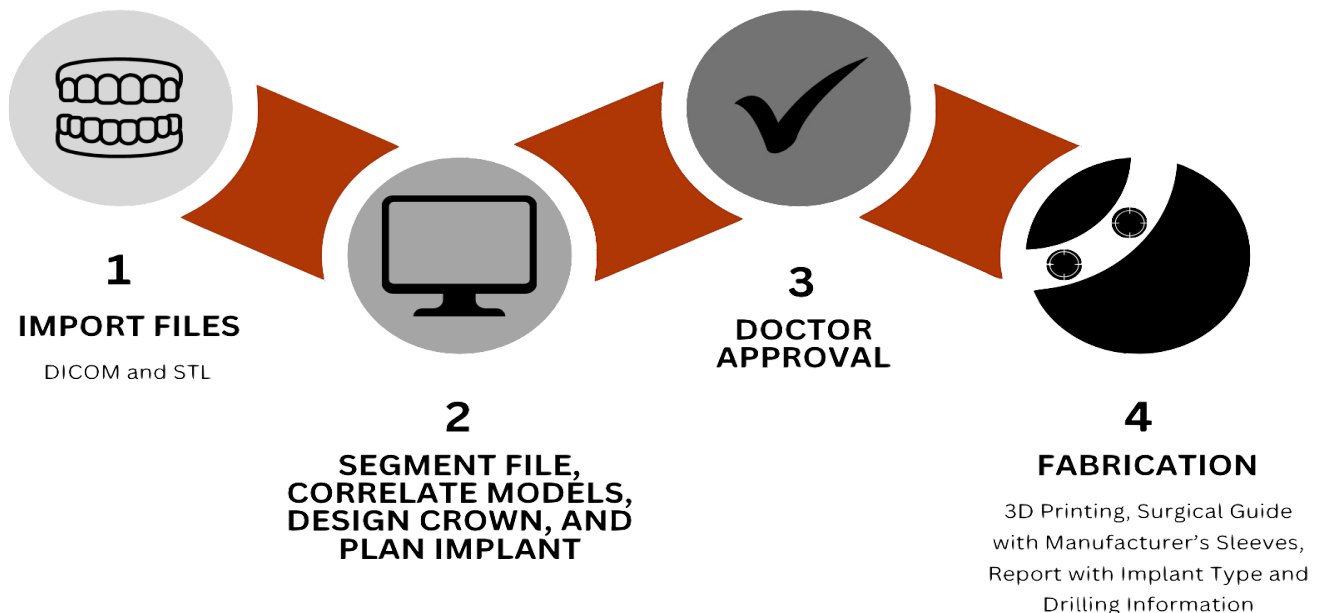

Our in-house surgical planning team enables a smooth and efficient implant process. By working directly with clinicians, we initiate the design phase to develop the required prosthesis, surgical guide, and supporting report. This collaborative workflow ensures a reliable plan for successful and predictable implant placement.

What is Needed:

- DICOM in Raw, DIEDM Format and STL Files
- Impressions OR Intraoral Scans
- Bite
- RX

Surgical Guide Workflow

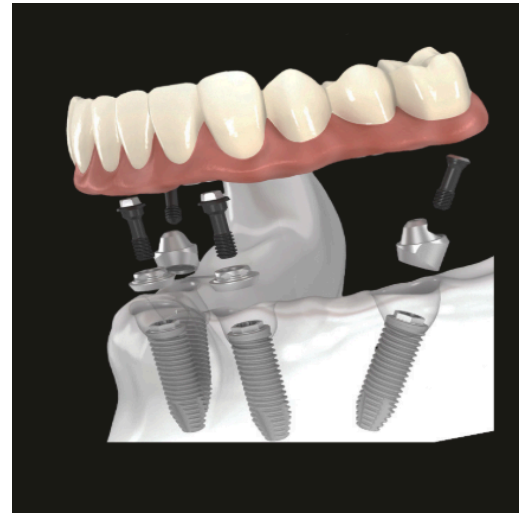

Full Arch

All-On-X

All-On-X is the traditional approach to solving the problem of missing multiple teeth and reconstructing the mouth of a patient to restore full function.

- Screw Retained Bridge
- Minimum Four Implants
- Esthetic Look
- Comfortable Feel

Atlantis™ Conus Abutment Overdenture

A non-resilient, implant-supported, removable dental prosthesis that delivers comfort and confidence.

- Minimum Four Implants
- Maximum Parallelism
- Easy to Clean
- Low Profile

Zirconia Bridge

This bridge is 100% zirconia, providing a modern prosthetic that is built stronger and provides pleasing aesthetics.

- Available in Full Zirconia or Anterior Cutback
- Exceptional Strength
- Durable
- Perfect for Limited Restoration Space

Locator Bar

Improve stability and precision for implant patients with a Milled Locator Bar.

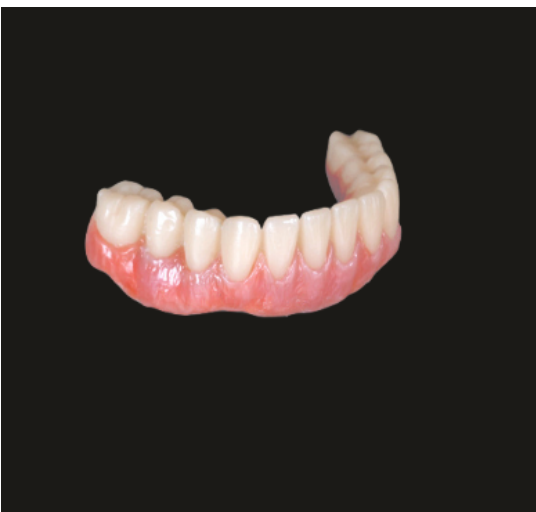

- CAD/CAM Framework
- Improved Stability and Support
- Better Distribution for Load
- Easy to Clean

Titanium Bar with Zirconia

A two-part implant bridge, supported with a titanium bar offers the strong structure needed for a full arch restoration.

- Optimal Strength
- Increased Rigidity
- Maximize AP Spread
- Available with Angle Screw Channel

PMMA

Our temporary milled PMMA provisionals can be used for short-term and long-term applications.

- CAD/CAM Designed
- Fast Turnaround Time with 3D Printing
- Natural Look
- High Strength and Density

Guards & Splints

Comfort H/S Bite Splint™

- Hard Outer Surface, Soft Inner Layer
- Severe Bruxing/Clenching
- Free of Acrylic and Metal
- Available in Pink, Blue, or Clear
- Least Expensive - \$

Also available in Hard or Soft!

ODL Custom Hard Clear Bite Splint

- Heat Cured Acrylic
- Fabricated on Semi-Adjustable Articulator
- Eliminates Posterior Excursive Interferences
- Color Tint Available
- Mid-Priced - \$\$

Aligners

smile shapers

The Benefits of Clear Aligners

Patient-Driven

Minimal Chair Time

High ROI

Esthetic & Convenient

Partner with a Leading Aligner Company

Fabricated out of biocompatible plastic, these clear aligners are virtually invisible, durable, and comfortable. Your patients will be astonished by how seamlessly our aligners blend in with their teeth and their life. These sequential aligners will gently shift teeth into alignment, so that every plan ends in a perfect smile.

LEVEL 1 - LIMITED 6

Indicated for patients who require minimal alignment.

LEVEL 2 - LIMITED 12

Indicated for patients who require moderate alignment.

LEVEL 3 - UNLIMITED

Indicated for patients who require advanced alignment.

Custom Shade Matching

Where Restorations and Artwork Come Together!

PM Dental Labs offers in-lab custom shade services for all of your patients. We strive to provide the utmost convenience while creating a natural and consistent prosthesis.

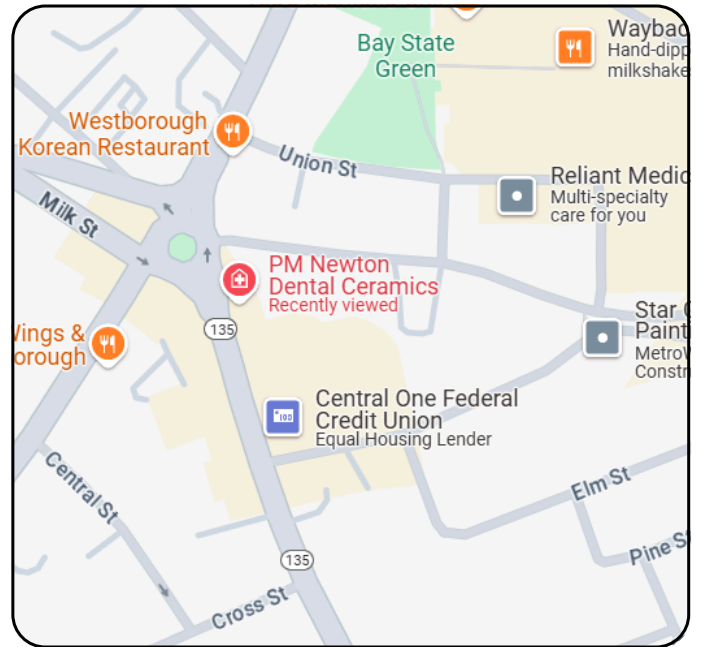

Advantages Include:

- Custom Shades Taken by Our Experienced and Skilled Certified Dental Technicians to Ensure Shade Accuracy
- Utilize the Latest Shade Guides and Technology
- Offered 5 Days a Week at ALL Locations
- Taken in Color-Controlled Environments for Precise, Esthetic Results
